

MILESTONE 3

Admin & Mentor Dashboard and Management System

Enterprise Learning Platform – Skill & Career Guidance System

1. Milestone Overview

Milestone 3 focuses on implementing **role-based Admin and Mentor dashboards** for the Enterprise Learning Platform.

Building on the authentication and Student Dashboard developed in Milestones 1 and 2, this milestone introduces dedicated management and teaching interfaces for:

- Administrators
- Mentors

Each role receives a different dashboard and set of permissions based on its responsibilities within the platform.

The objective is to provide administrators with centralized platform governance and mentors with the tools required to manage courses, students, assignments, quizzes, sessions, and learning activities.

2. Milestone 3 Objectives

The milestone provides:

- Admin Dashboard
- Mentor Dashboard
- Role-based dashboard access
- User management
- Role management
- Course management
- Course approvals
- Internship management

- Complaint management
 - Audit logs
 - Platform statistics
 - Mentor course management
 - Student activity monitoring
 - Assignment management
 - Quiz management
 - Session management
 - Enrollment monitoring
 - Notifications
 - Broadcast functionality
 - Role-based navigation
 - Protected APIs
-

3. Role-Based Access

The platform now supports separate experiences based on the authenticated user's role.

Administrator

Responsible for:

- Platform governance
- User management
- Roles and permissions
- Course approvals
- Platform monitoring
- Complaints
- Audits
- Internships
- System notifications
- Platform-level analytics

Mentor

Responsible for:

- Course creation
- Course management
- Student monitoring
- Assignments

- Quizzes
- Sessions
- Grading
- Enrollments
- Student communication
- Course notifications

The dashboard and available navigation options must be determined by the authenticated user's role.

4. Admin Dashboard

The Admin Dashboard provides a centralized overview of the entire platform.

The dashboard contains a personalized welcome section and platform-level statistics.

Welcome Section

Example:

Welcome, Admin

The section communicates the administrator's responsibility for:

- Platform operations
 - User governance
 - Real-time performance monitoring
-

5. Admin Statistics

The dashboard displays key platform statistics.

Total Users

Displays the total number of registered platform users.

Students

Displays the number of registered students.

Mentors

Displays the number of registered mentors.

Admins

Displays the number of administrators.

Total Courses

Displays the total number of courses available in the system.

Pending Approvals

Displays courses or other resources awaiting administrator approval.

Active Courses

Displays the number of currently active courses.

Complaints

Displays the number of complaints requiring administrative attention.

These statistics should be dynamically retrieved from the backend.

6. Admin User Management

The Admin Dashboard provides access to user management.

Administrators should be able to:

- View users
- Search users
- View user details
- Manage user status
- Assign/manage roles
- Monitor user activity
- Manage student accounts

- Manage mentor accounts
- Manage administrator accounts

User management should be protected by role-based authorization.

7. Role Management

Administrators should be able to manage platform roles.

Supported roles include:

- Student
- Mentor
- Admin

The system should ensure that users can only access functionality permitted by their assigned role.

Role changes should be tracked where appropriate for security and audit purposes.

8. Course Approval Management

The Admin Dashboard includes a **Pending Approvals** section.

Administrators can monitor courses or platform content requiring approval.

The approval workflow should support:

1. Mentor creates/submits a course.
2. Course enters pending status.
3. Administrator reviews the course.
4. Administrator approves or rejects the course.
5. Course status is updated.
6. Mentor receives the appropriate notification.

Possible course states include:

- Draft
- Pending Approval

- Approved/Published
 - Rejected
 - Archived
-

9. Complaint Management

Administrators can monitor and manage platform complaints.

The system should allow administrators to:

- View complaints
- Review complaint details
- Track complaint status
- Update complaint status
- Resolve complaints
- Monitor complaint history

Possible complaint states include:

- Open
- In Review
- Resolved
- Closed

Complaint updates should be recorded in the audit system.

10. Audit Logs

The Admin Dashboard includes **Audit Logs** for monitoring important system activities.

Audit events may include:

- User creation
- User updates
- Role changes
- Course approvals
- Course rejections
- Complaint updates
- System initialization

- Administrative actions

Each audit record can contain:

- Action/event
- User responsible
- Date and time
- Description
- Relevant resource/reference

Example events shown in the dashboard include:

- Complaint status update
- System initialization

Audit logs provide traceability and support platform security and governance.

11. Admin Notifications

The administrator dashboard includes a notification area.

Notifications may include:

- System health information
- New course submissions
- Pending approvals
- New complaints
- User activity
- Security alerts
- System announcements

Unread notifications should be visually identified.

12. Admin Navigation

The Admin sidebar provides access to administrative modules.

Navigation

- Dashboard
- Users
- Roles
- Approvals
- Internships
- Complaints Desk
- Audits
- Settings

The navigation should be displayed only to users with appropriate administrator permissions.

13. Mentor Dashboard

The Mentor Dashboard provides a dedicated workspace for instructors/mentors.

The dashboard is designed to help mentors manage their teaching responsibilities and monitor student activity.

Welcome Section

Example:

Welcome, Mentor

The section communicates the mentor's role in:

- Guiding students
 - Managing courses
 - Supporting learning
 - Delivering mentorship
-

14. Mentor Statistics

The Mentor Dashboard displays important teaching statistics.

Total Students

Displays the number of students associated with the mentor's courses.

Courses Created

Displays the number of courses created by the mentor.

Pending Assignments

Displays assignments requiring mentor attention.

Pending Quizzes

Displays quizzes requiring review or completion.

Published Courses

Displays the number of courses currently published.

Draft Courses

Displays courses still under development.

Total Enrollments

Displays the total number of student enrollments across the mentor's courses.

These statistics should be dynamically retrieved from the backend.

15. Mentor Course Management

Mentors should be able to create and manage courses.

Course management should support:

- Create course
- Edit course
- Save as draft
- Submit for approval
- Publish approved course
- View course details
- Monitor enrollment
- Track course status

Course Lifecycle

Draft

Submit for Approval

Pending Approval

Admin Review

Approved

Published

16. Student Activity Monitoring

The Mentor Dashboard includes a **Recent Student Activity** section.

This provides mentors with visibility into student actions.

Activities may include:

- New course enrollment
- Assignment submission
- Quiz activity
- Course completion
- Learning progress
- Other relevant student actions

The activity feed should display:

- Activity type
- Student

- Course/resource
 - Date and time
-

17. Mentor Notifications

Mentors receive notifications for important events.

Examples include:

- New student enrollment
- Assignment submitted
- Quiz activity
- Course approval/rejection
- Upcoming session
- Student activity
- Platform announcements

Unread notifications should be clearly identified.

18. Assignment Management

Mentors should be able to manage assignments associated with their courses.

Functionality includes:

- Create assignment
- Edit assignment
- View submissions
- Review submissions
- Grade assignments
- Provide feedback
- Track pending submissions

The dashboard should show the number of pending assignments requiring mentor attention.

19. Quiz Management

Mentors should be able to manage course quizzes.

Functionality includes:

- Create quizzes
- Edit quizzes
- Manage questions
- Set quiz availability
- Review quiz submissions
- Monitor quiz results
- Manage pending quizzes

The dashboard should display the number of quizzes requiring action.

20. Session Management

Mentors should be able to schedule and manage learning/mentorship sessions.

Session functionality includes:

- Schedule session
- Edit session
- View upcoming sessions
- Manage session details
- Provide joining information
- Track session status

The dashboard provides an **Upcoming Sessions** section.

Sessions may include:

- Course title
 - Session title
 - Date
 - Time
 - Session status
 - Join session action
-

21. Internship Management

The platform provides internship-related functionality for administrators and relevant platform users.

Administrators can manage internship opportunities and monitor internship-related activities.

The internship module can support:

- Internship listings
- Internship approvals
- Internship status
- Student opportunities
- Organization information
- Application monitoring

Detailed student internship functionality can be expanded in future milestones.

22. Role-Based Navigation

Each role receives a customized navigation menu.

Admin

- Dashboard
- Users
- Roles
- Approvals
- Internships
- Complaints Desk
- Audits
- Settings

Mentor

- Dashboard
- My Courses
- Lessons
- Grading
- Quizzes
- Sessions

- Internships
- Roster
- Inbox
- Notifications & Broadcast
- Settings

This ensures that users only see functionality relevant to their role.

23. JWT & Authorization Integration

Milestone 3 builds on the JWT authentication architecture established in Milestone 1.

After login, the backend identifies the authenticated user's role.

The authorization process is:

Login

↓

JWT Generated

↓

JWT Contains User Identity & Role

↓

Request to Dashboard/API

↓

JWT Verification

↓

Role Verification

↓

Permission Check

↓

Admin Dashboard OR Mentor Dashboard

The backend must prevent users from accessing APIs belonging to roles they are not authorized to use.

For example:

- Student cannot access Admin APIs.
 - Student cannot access Mentor management APIs.
 - Mentor cannot access Admin governance APIs.
 - Admin can access permitted administrative APIs.
-

24. Protected APIs

The following types of APIs should be protected by authentication and authorization:

Admin APIs

- User management
- Role management
- Course approvals
- Complaint management
- Audit logs
- Internship management
- Admin notifications
- Platform statistics

Mentor APIs

- Mentor dashboard
- Course management
- Student roster
- Assignments
- Quizzes
- Grading
- Sessions
- Enrollments
- Mentor notifications

Every protected API must validate both:

1. Authentication
 2. Authorization
-

25. Notifications & Broadcast

The platform provides role-specific notifications.

Admin

Can receive:

- System alerts
- Approval requests
- Complaints
- User activity
- Platform events

Mentor

Can receive:

- Student enrollments
- Assignment submissions
- Quiz activity
- Course updates
- Session reminders

The mentor platform may also support broadcasting announcements to relevant students.

26. UI / UX Requirements

Admin and Mentor dashboards should maintain the visual design language established in previous milestones.

Design Characteristics

- Clean modern interface
- Green/mint visual theme

- Rounded cards
- Soft shadows
- Clear typography
- Consistent iconography
- Responsive layouts
- Role-specific navigation
- Clear statistics
- Accessible controls

The dashboards should provide a professional management experience without overwhelming users with unnecessary information.

27. Responsive Design

The Admin and Mentor dashboards should support:

- Desktop
- Laptop
- Tablet
- Mobile where applicable

The responsive layout must prevent:

- Content overlap
 - Broken cards
 - Navigation issues
 - Text cutoff
 - Horizontal scrolling
 - Inaccessible controls
-

28. Milestone 3 Deliverables

Admin Dashboard

- Admin dashboard
- Platform statistics
- Total users

- Student count
- Mentor count
- Admin count
- Course statistics
- Pending approvals
- Active courses
- Complaint count
- User management
- Role management
- Course approvals
- Complaint management
- Audit logs
- Admin notifications
- Internship management
- Admin settings

Mentor Dashboard

- Mentor dashboard
- Student statistics
- Course statistics
- Pending assignments
- Pending quizzes
- Published courses
- Draft courses
- Total enrollments
- Course management
- Student activity feed
- Assignment management
- Quiz management
- Grading
- Session management
- Student roster
- Mentor notifications
- Broadcast functionality
- Mentor settings

Backend

- Role-based dashboard APIs
- Admin APIs
- Mentor APIs
- JWT authentication integration

- Role-based authorization
 - Protected API endpoints
 - User management APIs
 - Course approval APIs
 - Assignment APIs
 - Quiz APIs
 - Session APIs
 - Notification APIs
 - Audit APIs
-

29. Milestone 3 Outcome

At the completion of Milestone 3, the Enterprise Learning Platform will support **three major authenticated user experiences**:

Student

Learning, courses, progress, achievements, certificates, and career development.

Mentor

Teaching, courses, students, assignments, quizzes, grading, sessions, and mentorship.

Administrator

Platform governance, users, roles, approvals, complaints, audits, internships, and system monitoring.

The milestone therefore transforms the platform from a student-focused learning system into a **multi-role learning management and career guidance platform**.

Final Milestone Statement

Milestone 3 delivers dedicated Admin and Mentor dashboards with role-based access control, platform management, course administration, student monitoring, teaching tools, assignments, quizzes, sessions, notifications, approvals, complaints, and audit capabilities.

This milestone establishes the operational layer required to manage and scale the platform while maintaining secure separation between Student, Mentor, and Admin functionality.
